There is a reason why geese fly in a "V" formation. As each goose flaps its wings, it creates an "uplift" for the birds that follow. By flying in a "V" formation, the whole flock adds 71% greater flying range than if each bird flew alone. When a goose falls out of formation, it suddenly feels the drag and resistance of flying alone. It quickly moves back into formation to take advantage of the lifting power of the bird immediately in front of it. When the lead goose tires, it rotates back into the formation and another goose flies to the point position. The geese flying in back of the formation honk to encourage those up front to keep up their speed.

When a goose gets sick, wounded or shot down, two geese drop out of formation and follow it down to help and protect it. They stay with it until it dies or is able to fly again. Then, they launch out with another formation or catch up with the flock.

Phil 2:4 "Look not every man on his own things, but every man also on the things of others."

Gal 6:1-2 "Brethren, if a man be overtaken in a fault, ye which are spiritual, restore such an one in the spirit of meekness; considering thyself, lest thou also be tempted. Bear ye one another's burdens, and so fulfil the law of Christ."

1 Pet 3:8 "Finally, be ye all of one mind, having compassion one of another, love as brethren, be pitiful, be courteous:"
